

Amendments to the Claims:

The following listing of claims replaces all prior versions and listings of the claims in the application:

Listing of Claims:

1-29. (Cancelled).

30. (Currently Amended) A method for serologically identifying with improved accuracy an individual known to be weed pollen allergic as *Parietaria* allergic, comprising selecting an individual known to be weed pollen allergic, wherein it is not known if the individual is *Parietaria* allergic; selecting a pure *Parietaria* allergen component known to have limited or no cross-reactivity; contacting serum from an the selected individual known to be weed pollen allergic with a the pure allergen component, wherein the pure allergen component is pure Par j 1 or Par j 2 allergen component; determining the presence of IgE binding to said pure Par j 1 or Par j 2 allergen component; and identifying the individual as *Parietaria* allergic if the contacted serum contains IgE binding to said pure allergen component.

31. (Previously Presented) The method according to claim 30, further comprising selecting an allergy treatment involving extract, proteins or peptides derived from a *Parietaria* species for an individual identified as *Parietaria* allergic.

32. (Previously Presented) The method according to claim 30, wherein the pure allergen component is Par j 1.

33. (Previously Presented) The method according to claim 30, wherein the pure allergen component is Par j 2.

34. (Previously Presented) The method according to claim 30, wherein the pure allergen component is recombinant.

35. (Previously Presented) The method according to claim 34, wherein the pure allergen component is recombinant Par j 1.

36. (Previously Presented) The method according to claim 34, wherein the pure allergen component is recombinant Par j 2.
